

NH Envirothon & Environmental Sciences Workshop

Sponsored by experts from New Hampshire Envirothon

Monday, November 4, 2024

8:30 AM – 2:30 PM

NH Audubon

84 Silk Farm Road, Concord, NH 03301

Join the science experts behind the NH Envirothon for a full day of hands-on training! Bring your Envirothon teams and/or Environmental science classes. Geared towards middle and high school teachers and students, participants will gain valuable knowledge of Envirothon concepts that are interconnected to NGSS, Environmental Science, and Ecology. Highlights of the day will include rotations in:

- Aquatics – water quality, macroinvertebrates, climate change impacts to aquatic ecosystems, etc.
- Current Issue – 2024 Theme: **Roots and Resiliency: Fostering Forest Stewardship in a Canopy of Change**
- Forestry – forestry terms, silviculture, native tree ID, Biltmore stick use, etc.
- Soils – Factors of soil formation, parent materials, soil horizons, soil textures, etc.
- Wildlife – wildlife habitats, native wildlife ID, wildlife ecology, etc.

Students should pack a lunch, notebook, and water bottle.

All participants should wear outside weather appropriate footwear and clothes.
